

ACROLINK®

LWG-8N Lead wire *24 gold plating*

LWR-8N Lead wire *Rhodium plating*

Stressfree 99.999999% 8N Purity Copper

It is equipped with the connector which has begun to sharpen from solid Beryllium Copper of the world's first creation. It is 8N-Cu Lead wire of the admiration. It is 500 sets of limited release in the world.

This is the Multi-stranding wire

Braided lines in three strands which made five 8N-Copper wire of 0.12mm twist wire into string.

It follows that it reduces a distortion between the line for wonder, and a characteristic of the transmission of the music signal improves drastically.

The covering material adopts special Polyolefin. This is already familiar with an audio system cable of ACROLINK.

Development new as for the Contact-pin. It is equipped with the connector which has begun to sharpen from solid Beryllium Copper of the world's first creation. There are 24-gold plated or Rhodium plated over the plating of the pure Silver of 10 micron. You can choose the difference of two nuance of a delicate sound.

The joining to the cable of the contact-pin is pressure way of wearing type with screw. No solder. Because there are not impurities, there is feeling of transparency, and powerful sound is realized.

New as for the Contact-pin

The 24-gold plated model reproduces a nuance of the Mid and High-frequency in high density. The Rhodium plated model directs a flat response in high definition over all bands.

It is 250 sets of each, in total 500 sets of limited release in the world
